Formula Racings shakedown tests of the teams new Peugeot P1, P908 Le Mans challenger has begun in earnest for the commencement of the 2010 ILMS season. Debuting the car at Champion Motorsports North American ILMS series league race at Sebring, Mark Bos started from P1 and managed to set the fastest lap of the race on Lap 2 of the event. Tyre troubles prevented a debut win with some visits to the pits, a drive through penalty putting the car even further down the running order in the opening laps. A long hard fight back through the race saw the FRO Peugeot eventually finish on the podium with a P3 position at the close of the 1.45mins event. A good debut for the teams first race in LMP1, but a little dissapointed. Click on read more for some pictures from the event. [Results](#) | [Replay](#)

The Opening laps where full of action with more than 30 Prototypes packing the track!

Although a P3 podium in our first P1 class race is a good achievement, to give up a 3 second lead won on lap 1 and 2 meant the team left the track a little dissapointed but will be back for more!
